A new era of architecture is dawning

The Universe attracts by the infinite depth of its sky, both dark and bright, which gives it a magnetic and timeless dimension. The blackness that envelops planets, stars and other constellations intrigues and provides a form of attraction that makes it an inexhaustible source of inspiration.

The colour black then invites itself into art, decoration or architecture and becomes a symbol of elegance. By playing with contrasts, it asserts itself in contemporary designs that leave no one indifferent.

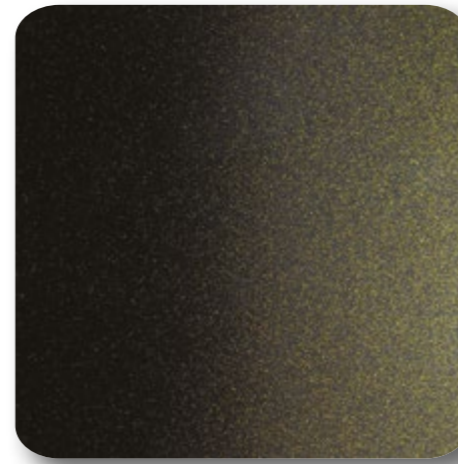

ArcelorMittal Construction is now revealing its vision of Black through four exclusive coatings that offer this colour in glittery, iridescent or matt shades to sublimate your facades.

Properties and applications

- Very high UV resistance: Category RUV4 according to EN 10169
- Very high corrosion resistance: Category RC4 and RC5
- Seaside 1 to 3 km

Coating description

Stardust Venus 19G1

- Fluorinated thermoplastic resin 60 µm
- Especially suitable for metallic colours
- Excellent colour and appearance stability
- Anti-fouling properties
- Warranty up to 25 years

Naturel Serawak 49AG

- Thermosetting polyester resin
- Matte finish
- Without light reflection
- Very good corrosion resistance
- Warranty up to 20 years

Hairexcel Altaïr 69F4 Hairexcel Antares 69C6

- Polyurethane 60 µm
- Glittery grained appearance
- Highly scratch-resistant coating
- Excellent corrosion resistance
- Warranty up to 30 years
